## INNOVATIVE GARDEN STREAMERS

## INNOVATIVE GARDEN STREAMERS

“ Your old, broken or useless items that mess your sheds, will now save your money on garden decorating.

Here are some simple but charming resources that create soothing and warm outdoor rooms and gardens. These possessions reflect today's focus on saving the environment and rejoice an original ecological design.

## A TREE HOUSE, A FORT OR SECRET HIDEOUT - TREE HOUSE TO MAKE ADULTS JEALOUS

*A simple, easy hideaway for the backyard!*

A Tree house, site-specific installation can be done using Old wood from trees that's cut down. This inhabitable sculpture can be a part open-air classroom, part viewing point, or just a part artwork. This intriguing work invites visitors of all ages to experience the Garden in a new way.

The model was developed ultimately to help children to reconnect with nature, as well as enjoy Party play time. It let go of earthbound encumbrances and be free. A growing Tree house stimulates that inspires the kid in all of us.

## BIRD FEEDER

“ Enjoy the company of your tame neighbors in your yard. Every day, more and more habitat is lost to the spread of development.

**B**ut you can help these tamed by offering them sanctuary in your own backyard (or front yard, roof-top garden, or deck), no matter how small. It does not need Naturescaping to offer as such neither safety to them.

One of the best ways to enjoy wildlife in the comfort of your home is to watch birds at a feeder. You'll be amazed at the variety of birds that will come to your feeder throughout the year. Feeding certainly can help individual birds in your neighborhood.

A birdfeeder, bird table, or tray feeder are some devices that can be placed outdoors to supply bird food to birds (bird feeding). The success of a

bird feeder in attracting birds depends upon its placement and the kinds of foods offered,[1] as different species have different preferences.

Your old crystals, chandeliers can also be used to make this bird feeder. And a dull yard will start to match the inside of your house!

## PLANTS GROW EVERYWHERE

**Plants grow everywhere:** The wonderful thing about plants is that they can grow just about anywhere – as long as there's a sunny spot for their leaves and some good soil and water for their roots.

With these things plants can grow in the most unlikely of places – even in your old shoe!

## PLANTER FROM PVC PIPES

*When designing an indoor planter from PVC pipes, the size, placement, stability and drainage needs of the intended plants are important concerns.*

Beginning seedlings require only a small amount of soil, but the demands of adult plant roots are greater. Different plants have specific light and drainage requirements that can guide the eventual placement and soil types for the planter.

Plants that grow tall or climb, such as tomatoes or peas, may need to be staked as they grow. Root vegetables may be less conducive to access space required for harvest.

## SWINGING GROUP

*Make a new toy this week. To have more fun, without this you will feel that your garden is incomplete.*

1. Take an ordinary tire...
2. Paint it red...
3. Add some hardware and chain...
4. Then get a little creative...
5. And hang it from the tree house... And just have fun...

## CUT WOOD PATH OR CEMENT PATH OR GARDEN SEATER

*Do you have a garden that is divided as a raised bed? Is the grass in between a pain to trim?*

The Cut wood path or cement path that looks wicked cool.

- (a) If you had plenty of Old wood in your backyard trim it to two inch (or so) disks from the logs. All in different sizes. Dig into the ground to press them in. Pack around with extra mud / Pebbles of your choice at the edges.
- (b) If you have some amount of left over cement mixture. Place a big sized thick leaf on a board, apply the mixture on top of it. Let it dry in sun until its set.

# PLANTERS THROUGH USED BARRELS

“ Do not afford to buy strawberry towers or special planters?

**M**ake yourself with a typical barrel in an hour or two, at affordable prices! Considering a typical barrel costs less than a few cost and will last for decades, takes between 1-5 hours to modify depending on your skill with tools, paints and how many you're making at once...

This is one of the most cost-efficient, space-efficient, and practical ways of growing ever conceived! It requires only the floor space of the container you use.

They are simply stunning when loaded with produce!

Handmade home garden decorations are excellent ways to explore recycling ideas and use your resourcefulness and creativity for personal and unique interior and backyard decorating.
