" YOUR DREAM SWIMMING POOL... WILL BE COMING TRUE NOW "

Build an oasis in your own backyard reflecting your own style. Enjoy the pleasure of a beautiful swimming pool in the most eco-friendly and cost effective way.

PRIVATE SWIMMING POOLS

PUBLIC SWIMMING POOLS

SWIMMING POOL - SAFETY MEASURES

Pools can be either indoors or outdoors. They can be of any size and shape, and in ground or above ground. Most pools are permanent fixtures, while others are temporary, collapsible structures.

PRIVATE SWIMMING POOLS

Private pools are usually smaller than public pools, on average 12 ft × 24 ft (3.7 m × 7.3 m) to 20 ft × 40 ft (6.1 m × 12 m) whereas public pools usually start at 80 ft (24 m). Home pools can be permanently built-in, or be assembled above ground and disassembled after summer. Privately owned outdoor pools in backyards or gardens started to proliferate in the 1950s in regions with warm summer climates.

Private pools are increasingly a feature of homes in greater latitudes. For example, in India many larger homes are now refurbished with indoor and outdoor pools, usually in the backyard or in a conservatory.

PUBLIC SWIMMING POOLS

Public pools are often part of a larger leisure centre or recreational complex. These centres often have more than one pool, such as an indoor heated pool, an outdoor (chlorinated or ozonated) pool which may be heated or unheated, a shallower children's pool, and a paddling pool for toddlers and infants.

Many public swimming pools are rectangles 25 m or 50 m long, but they can be any size and shape. There are also elaborate pools with artificial waterfalls, fountains, splash pads, wave machines, varying depths of water, bridges, and island bars.

SWIMMING POOL - SAFETY MEASURES

As a precautionary measure, Government has introduced many rules and regulations to avoid casualties. Many products exist, such as removable baby fences, floating alarms and window / door alarms. Some pools are equipped with computer-aided drowning prevention or other forms of electronic safety and security systems. Suspended ceilings in indoor swimming pools are safety-relevant components. The selection of materials under tension should be done with care. Especially the selection of unsuitable stainless steels can cause problems with stress corrosion cracking.

WHAT WE DO.....

We, at *Sun & Black Flowers* has been providing quality swimming pool, Jacuzzi Spa, Endless Pool or Sauna a reality for many satisfied customers over the years. Our team is dedicated to giving their all to see that the pool they have installed is everything the customer could want.
