## » Industry Trends

Fogger nozzle is a new method of softscape introduced and experimented in India . Fogger nozzle create a fog thereby cleaning the dust accumulated on the leaves of the plants and make them look cleaner and greener. This also reduces the surrounding temperature and stimulates the plant growth.

Fogger Nozzle is a successful product in the market amongst landscaping designers and horticulturists as they find it easy for watering the plants. This has shown successful results .

## » Features

ECR site, The land is 2400sqft in area and it was our clients dream to built a swimming pool with kids pool. It was a lot of challenge for us, as our clients requirement was a swimming pool with kids pool with sufficient car parking. With our teams effort and clients support we completed the project in 4 months with a swimming pool with kids pool, water falls on stone finished wall, parking area for two cars and also we managed to built a small sit out area under a wooden pergola. This was a challenge and the best part was 'we exceeded clients expectation' and did our best.
