Turn the night into the light. Accentuate an outdoor structure such as the pictured water features .

Cool nights are here. A gentle breeze, sweet smelling blossoms in air...

it's time to take the Saturday evening food and entertainment outside. Gentle landscape lighting can set the tone for an enchanting evening outdoors. Consider landscape lighting to accentuate the architecture of a structure such as a gazebo, pool house, pergola, or even a bar. The right lighting creates a welcoming ambience for family and friends. Today, the styles of decorative lights and premium brands are endless. The lights can address a plethora of needs such as up lighting, down lighting, silhouetting, focal point lighting, deck and hardscape lighting and specialty lighting.

Benefits of Garden Lighting

Garden Lighting Improves entrance appeal, highlights trees, shrubs, porches and special architectural features.

It Creates atmosphere, the right lighting creates a warm and welcoming atmosphere for the exterior of your home and yard and provides ambience for your entire grounds setting.

Dual enjoyment, properly designed exterior lighting can be

Increases the safety and security of your home. Night-time visitors can walk safely to your front door. Outdoor entertaining is much safer when guests can see the terrain. One of the best advantages of an outdoor lighting system is that it is a deterrent to burglars.

Additionally, today's LED (light-emitting diodes) lights address environmental and financial concerns. Although the initial cost of LED lights may be higher, LED lighting will prove to be a wise choice on many levels.

LED lighting can save up to 85 percent of the electricity used by incandescent bulbs and up to 50 percent of electricity used by fluorescent bulbs.

The U.S. Department of Energy estimates that widespread adoption of LED lighting by 2025 will:

- Reduce electricity demands from lighting by 62 percent.
- Eliminate 258 million metric tons of carbon emissions.
- Reduce the amount of materials being put into landfills.
- Avoid the building of 133 new power plants.
- Save the US over \$280 billion.

Another option of using low voltage for decking lights in the garden is making the best use of solar energy.

Today's solar lights are brighter, use less energy, and can run for longer periods of time. They use a solar panel to capture sunlight throughout the day and charge a battery that powers light-emitting diodes (LEDs) during the night.

While solar lights can be more expensive initially, they end up saving you money by running on free energy, plus they're easy to install.

Sun & Black Flowers offers the highest quality and largest selection of low voltage, landscape and architectural lighting products. We can work with you to create the exact look you desire. We expertly designs outdoor landscape lighting systems to enhance, secure and accent your property.
